

VITAL STIM PLUS

Enhance Therapy with sEMG Biofeedback Technology Interactive Therapy allows patients to receive visual and audible feedback leading to enhanced patient engagement during swallowing exercises. Supplementing a standard therapy program with sEMG biofeedback facilitates functional swallowing recovery .

Swallow in Action

project live treatment progress onto a computer or tablet screen. The Screen Mirroring technology allows clinicians to guide patients through personalized, targeted swallowing exercises. Preset or customized programs allow the provider to truly customize treatments while biofeedback and visuals create a patient-focused experience that encourages engagement and achievement of goals. Immediate Patient Progress Data Quantify treatment progression with objective data that demonstrate outcomes for each therapy session.

The Taste of Independence

VitalStim Plus neuromuscular electrical stimulation helps recruit and re-educate muscles in the process of swallowing. Under the guidance of a clinician, patients partner in an interactive therapy that aids muscle strengthening to rehabilitate swallowing. sEMG biofeedback helps to increase effort and duration
